

04 Service Pillar / Data & Analytics

Data & Analytics

Every service we deliver produces structured, spatial, time-stamped data. Our analytics practice turns that exhaust into the models, dashboards and APIs that power MERIDIAN™ — and into institutional memory for our clients.

WHAT THIS COVERS

01

Spatial data warehouses and master data management

02

Predictive deterioration and demand models

03

Executive dashboards and regulatory reporting automation

04

Integration with ERP, GIS and financial systems

05

Data quality frameworks and stewardship programmes

06

Custom platform development on the MERIDIAN™ core
